

Activity Report 2017

Biozientzietako Ikerkuntza Kooperatiboko Zentroa
Centro de Investigación Cooperativa en Bociencias

Mission:

Conducting research of excellence in the field of the life sciences, covering the entire value of R&D&i, including technology transfer and commercial exploitation of the generated scientific results.

Strategic Challenges:

- Research of excellence
- Technology Transfer
- Collaboration with RVCTI agents
- International recognition
- Training and promotion of research talent
- Attraction and retention of talent
- Communication and Outreach
- Excellence in Management

Competitiveness:

- Leading infrastructures
- Human Resources
- Technical and administrative support
- Competitive salaries
- Goal-Fulfillment Incentives

Strategy:

Commitment to specialization and excellence

New Lab

Alberto Fernández- Tejada
Group Leader

University of Oxford, UK

ikerbasque
Basque Foundation for Science

Chemical Immunology Lab

Research lines

- Synthesis
- Biological evaluation
- Immunological studies of glycoconjugates

* Alberto Fernández-Tejada (Logroño, Spain, 1982) graduated with a degree in Chemistry at the University of La Rioja (2004), where he also obtained his PhD in 2009 under the supervision of Prof. Jesús M. Peregrina and Dr. Francisco Corzana. In 2010, he pursued postdoctoral studies at Memorial Sloan Kettering Cancer Center (MSKCC, New York) in the laboratory of the late Prof. David Y. Gin funded by the Spanish Ministry of Education with the sponsorship of the Fulbright Commission. Then, he continued working at MSKCC supervised by Prof. Samuel J. Danishefsky as a Marie Curie International Outgoing Fellow. In 2014, he moved back to Spain to work with Prof. Jesús Jiménez-Barbero as part of the reintegration phase of his current Marie Curie Fellowship to leave in September 2015 to Oxford with a new MSCA grant.

Training

15 Prácticas formativas de Grado

UAB
Universitat Autònoma
de Barcelona

6 Trabajos Fin de Grado

5 Erasmus

Center of Excellence Severo Ochoa

The “Center of Excellence Severo Ochoa” Award, within the subprogram of Institutional Strengthening of the State Plan for Scientific and Technical Research and Innovation, aims to fund and accredit public research centers and units on any areas that demonstrate scientific leadership and impact at global level, as well as active collaboration in their social and business environment.

The Centers of Excellence Severo Ochoa are organizational structures with highly competitive strategic research programmes in the frontiers of knowledge. They are among the best in the world in their respective scientific areas.

Scientific Output Highlights

CIC bioGUNE researchers publish more than 150 publications. They include 25% publications with Impact Factor above 10. The average IF in 2017 reaches 7.

A new research group (Chemical Immunology) joins CIC bioGUNE.

Atlas Molecular Pharma, a spin-off Company from CIC bioGUNE has been able to get the Orphan Drug Designation for its first molecular entity for Congenital Erythropoietic Porphyria.

Competitive funding in CIC bioGUNE reaches 55% of total funding.

CIC bioGUNE researchers obtain four new International projects in 2017.

CIC bioGUNE is recognized with the Severo Ochoa distinction as Center of Excellence.

CIC bioGUNE Electron Microscopy is awarded with long-term programme Access at eBIC-diamond.

Prof. Richard Henderson member of the Scientific Advisory Board of CIC bioGUNE is awarded with the Nobel Prize in Chemistry.

Awards and Recognitions

Arkaitz Carracedo galardonado con el premio Radio Bilbao a la Excelencia 2017 en la categoría de investigación

June Ereño Orbea, premio a la mejor tesis defendida en 2015/2016 por AUSE (Asociación de Usuarios de Sincrotrón de España) - octubre 2017.

Jesús Jiménez Barbero ha sido designado nuevo miembro de la European Academy of Sciences (EURASC)

Investigación

El director científico de CIC bioGUNE, nuevo miembro de la EURASC

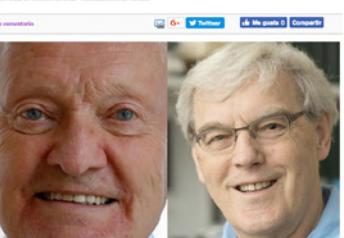

Jesús Jiménez Barbero, director científico de CIC bioGUNE e investigador del programa Ikerbasque, ha sido designado nuevo miembro de la European Academy of Sciences (EURASC), asociación internacional independiente que tiene como objeto reconocer y elegir a sus académicos entre los mejores científicos europeos. Esta designación supone un nuevo reconocimiento al prestigio internacional del responsable científico del centro de investigación vasco.

El Nobel premia a dos científicos químicos vinculados al CIC bioGUNE

El Nobel premia a dos científicos químicos vinculados al CIC bioGUNE

Resonancia en la red social: Facebook, Twitter, LinkedIn, etc.

ESTOCOLMO - El Nobel de Química reconoció ayer a tres científicos por el desarrollo de la criomicroscopía electrónica para el estudio de las biomoléculas, una técnica que ha permitido a la biología entrar en una nueva era. El británico Richard Henderson, el germano-estadounidense Joachim Frank y el suizo Jacques Dubochet comparten el premio por sus "descubrimientos revolucionarios sobre la resolución de las moléculas de la vida", señaló en su fachada la Real Academia Sueca de las Ciencias. De la circunstancia que los tres premios estén vinculados a las actividades investigadoras del CIC bioGUNE, Richard Henderson participa en el diseño de las líneas estratégicas del centro y Joachim Frank, por su parte, ha sido maestro del doctor en Biología Molecular, Mikel Valle, investigador del centro en el ámbito de biología molecular.

Según informó CIC bioGUNE, el británico Richard Henderson es miembro asimismo del Comité Científico Asesor internacional del centro, que se reúne de forma periódica en sus instalaciones de Dirie, con la misión de "anotar la producción científica desarrollada por la entidad y diseñar las líneas estratégicas de trabajo para el futuro".

Arkaitz Carracedo galardonado con el Premio Constantes y Vitales a joven talento en investigación biomédica

científico de CIC bioGUNE

Reconoce la trayectoria del científico con el premio HSC Gamboa Winkler

La Sociedad Química de Hungría ha galardonado a Jesús Jiménez Barbero, director científico de CIC bioGUNE, con el premio Gamboa Winkler. Este galardón es concedido de forma alterna por la Sociedad Química de Hungría y por la Real Sociedad Española de Química y reconoce la trayectoria de los científicos más prestigiosos del país diferente al que concede el galardón. Con motivo del acto de entrega del premio, Jesús Jiménez Barbero impartió una serie de conferencias en distintas Instituciones de Hungría a finales de agosto. Jesús Jiménez Barbero es Profesor de Investigación Ikerbasque y director científico de CIC bioGUNE desde Noviembre de 2014. Este investigador, actual presidente de la Real Sociedad Química de España, obtuvo su doctorado en la Universidad Autónoma de Madrid en 1987. Realizó estancias post-doctorales en la Universidad de Zürich (Suiza), el National Institute for Medical Research de Mill Hill (Reino Unido) y en la Universidad Carnegie Mellon de Pittsburgh (EE.UU) entre 1988 y 1992. En 1995 fue nombrado investigador científico senior en el Instituto de Química Orgánica del CSIC y en 2002 se trasladó al Centro de Investigaciones Biológicas (CIB-CSIC) como Profesor de Investigación del CSIC, donde dirigió el Departamento de Biología Química-Física hasta su llegada a CIC bioGUNE.

NMR based structural biology in Signalling, Immunity and Cellular and neuronal degeneration and protection

The role of partially disordered proteins in two fields of research is investigated. One is the adaptor protein SLP65 which interacts with CIN85 (1). The two proteins are essential for B cell activation. The protein is found to be mainly unstructured and various segments entertain different functions or interact with membranes, SH3 domains and forming coiled coils. Based on the structures, a molecular lego will be described that reduces the SLP65/CIN85 interaction to its absolutely necessary essentials. The two proteins can form supramolecular structures which might be related to function.

Prof. Griesinger's group is additionally interested in a class of IDPs that are important in neuro- and cellular degeneration, which form oligomers and fibrils. Interference with these aggregates specifically on the oligomer level proves to be a valid concept for treatment of devastating diseases such as Parkinson's, Alzheimer's, Creutzfeldt Jacob disease and type II diabetes mellitus.

December 19, 2017
12.00 H

Retromer to the rescue

Deregulation of protein homeostasis is a common feature of aging, and underlines the multifactorial nature of many neurodegenerative disorders. Endosomes are key intracellular recycling compartments with a major role in protein homeostasis. Not surprisingly, endosomal dysfunction is a convergent point in multiple age-related neurodegenerative disorders. Retromer complex plays a central role in controlling protein trafficking and protein homeostasis at endosomes, and defects in retromer function have been found to be related to Alzheimer's disease and Parkinson's disease. The presentation will cover the current state of the art, recent results and translational strategies.

PRACTICAL WORKSHOP

Bioinformatics Tools to study exosomes' effects

DATE: 13-15 November, 2017

VENUE: CIC bioGUNE, Derio (Bizkaia) SPAIN

CIC bioGUNE **GEIVEX** **ANAXOMICS** **REDIEX**

Organizers:
JuanMa Falcón-Pérez / Félix Royo / Marc Clos
Exosomes Lab. & Metabolomics Platform, CIC bioGUNE
Félix Elortza / Mikel Azkalgorta
Proteomics Platform, CIC bioGUNE
Ana M Aransay / José Luis Lavin / Ana Rosa Cortazar
Genome Analysis Platform, CIC bioGUNE
Participation:
Teresa Sardon / Unai Cereijo (Anaxomics Biotech, Barcelona)

2017 March, Thursday 23rd

Organized by:
JuanMa Falcón-Pérez, PhD,
IKERBASQUE Professor
CIC bioGUNE, CIBERehd
Derio, Bizkaia, SPAIN

Venue:
CIC bioGUNE
ATRIO Edificio 800
Parque Tecnológico de Bizkaia
Derio, 48160, Bizkaia

A networking event to disseminate knowledge and promote local interactions in the field of extracellular vesicles

SPONSORS

ThermoFisher SCIENTIFIC, BD, CONDA pronadisa, GEIVEX, teknovas, Cultek

Translating innovation from Academia to Society in Biological Sciences

November 21st, 2017 9:30-14:30

Venue: CIC bioGUNE Parque Tecnológico de Bizkaia Edificio 800 (Atrio)
