

Postdoctoral Researcher (Bilbao, Spain)

A postdoctoral position financed by (BFU2016-77408-R MINECO/FEDER, UE) to study the structural basis underlying magnesium transport by the Cyclin M (CNNM) family of transporters and their role in several diseases is available in the laboratory of Dr. L. Alfonso Martinez-Cruz at the Structural Biology Unit of CIC bioGUNE in Bilbao.

We seek an outstanding, enthusiastic and highly motivated postdoctoral fellow with Ph.D. training in structural biology (X-ray crystallography and electron microscopy), molecular biology, biochemistry and a strong publication record. Knowledge and expertise in one or several biophysics techniques including ITC, CD, DSC, SPR, or NMR are highly valuable.

Candidates are expected to have analytical skills and be proficient in oral and written communication

Potential candidates should send their CV to rrhh@cicbioگونه.es indicating reference **43142** in the subject
