

Predoctoral contract Structural Biology, Bilbao

A predoctoral position in Structural Biology is immediately available in the Membrane Trafficking Lab lead by Dr. Aitor Hierro at CIC bioGUNE in Bilbao, Spain. This is a full-time, four-year position funded by The Spanish Ministry of Economy, Industry and Competitiveness – MINEICO to the grant/project BFU2017-88766-R.

Current studies are focused on supramolecular organization and function of endosomal coat complexes using a combination of X-ray crystallography, cryo-electron microscopy (cryo-EM) and cryo-electron tomography (cryo-TM) to elucidate fundamental aspects of intracellular traffic and neurodegeneration.

The Structural Unit at CIC bioGUNE is very well equipped for the structural work holding access to X-ray crystallography, NMR and EM local facilities as well as regular access to synchrotron and world-class cryo-EM/TM platforms.

Application procedure:

The application deadline is very tight, therefore, aspirant candidates holding a Master Degree in Sciences should submit as soon as possible a cover letter, a CV with qualifications and the e-mail addresses of potential references, using the following [form](#) and indicating [43132](#) as reference.
