

CIC bioGUNE – CIC microGUNE
Joint Workshop at CIC bioGUNE. Build. 800
SUMMARY PROGRAM – July 13, 2009

10:15 Welcome by José M Mato

10:20 José M Mato

General Presentation of CIC bioGUNE

10:25 Carlos Luri

General Presentation of CIC
microGUNE

**CIC microGUNE presentations,
followed by five minute
discussions**

10:30 Jesús Ruano

Fluid handling polymer components.

11:00 Sergio Arana

Electrochemical & magnetic detection.

11:30 Santos Merino

Micro & nanostructuring of metals and
polymers.

12:00 COFFEE-BREAK

**CIC bioGUNE presentations,
followed by five minute
discussions**

12:30 Manuel Rodríguez

Understanding Ubiquitin-driven
networks using Ubiquitin traps:
TUBE_s.

13:00 David Gubb

Towards the cryopreservation of
Drosophila: Controlling cooling rates,
cryoprotectants and ice nucleation
events.

13:30 Edurne Berra

Manipulating the hypoxia signalling
cascade as a therapeutic approach.
